

# ClickShare

The one click wonder

# Experience the one click wonder

Meetings. Can you imagine your day-to-day business life without them? Probably not. Would you like them to be more productive? You bet!

ClickShare is Barco's answer to some very recognizable issues commonly experienced in meeting rooms by millions of people worldwide. This innovative solution removes the hassle of connecting to the meeting room AV equipment, letting you share your laptop content with the other participants.

In other words: when you walk into a meeting room and see a ClickShare set on the table, you know you only need to focus on the meeting – not the equipment.

## Present with confidence

Click and you're on-screen. It is that simple. No matter how sophisticated the AV equipment in the room seems, ClickShare handles all of the technology overhead for you. No matter if you are a MAC or a PC user. This allows people to present with confidence – without worrying about technical issues.

## More than PowerPoint

Sure, ClickShare can immediately put your presentation on the meeting room display. But why stop there? Show a high-resolution still image? No problem – your laptop resolution is transferred to the AV system. What about spicing things up with a video clip? ClickShare can handle it<sup>1</sup>.

And what about sound? Channel it through the meeting room's audio system, not just through those tiny speakers built into your laptop<sup>2</sup>.

<sup>1</sup> Supporting frame rates of up to 20 fps

<sup>2</sup> Sound available through a software update by Q4 2012

# Collaboration made easy

The essence of a meeting is people coming together to collaborate. But true collaboration is often difficult when only one person controls the room's main display, deciding what is shown and what is not. How often has the hassle of switching the video cable prevented you from sharing something?

ClickShare introduces meeting room democracy - where everyone has the opportunity to be on-screen. Up to four people simultaneously. The enhanced collaboration will change meeting dynamics forever.

## Always the right resolution

Connecting a ClickShare Button to your laptop does not change your screen resolution. The days of weird-looking screens produced by re-connecting a video cable are over. ClickShare's intelligence makes optimal use of both the laptop's and the AV system's highest resolution to display the sharpest possible images on-screen.

### The facts:

- Every day: 30 million PowerPoint presentations are produced worldwide
- This adds up to 11 trillion annually.
- From your own experience, imagine how many of them experience technical difficulties...
- According to IT departments, it takes 23.1 minutes (on average) to resolve issues
- Multiplied by the number of attendees ... what a tremendous amount of wasted people power!
- It typically costs €9,500 per room per year simply to maintain the meeting room technology

# A device you'll want to use

ClickShare couples usability with good looks. Every time you use it, you get the great impression you had the first time you saw it. Just imagine how this will boost your company image. With ClickShare, reluctance to switch the cable shifts into eagerness to click the button!

## ClickShare Button

The most iconic components, ClickShare Buttons put the "Click" into ClickShare. Plug one of these USB-powered devices into your laptop, click the button, and share your content using the meeting room's AV equipment.

To ensure that your content is displayed on the right screen, every ClickShare Button is paired with a ClickShare Base Unit. The pairing process is quick and simple, so ClickShare Buttons can be transferred across meeting rooms without a problem. Multiple ClickShare Buttons can be paired to the ClickShare Base Unit, and up to four people can be on-screen at the same time.

## ClickShare Base Unit

Although not always visible, the Base Unit is the brain of the ClickShare system. This processing unit receives the wireless stream from the Buttons, and makes sure it is displayed in the right way.

## ClickShare Tray

The classy ClickShare Tray holds the ClickShare Buttons when they are not in use. Up to five Buttons fit in one Tray.

A ClickShare set consists of a ClickShare Tray, four ClickShare Buttons and a ClickShare Base Unit. Additional items are sold separately.

### **ClickShare Rack Mount**

For meeting rooms with a dedicated AV rack, an optional Rack Mount for the ClickShare Base Unit is available. This integrates ClickShare seamlessly into the room's existing high-end AV installation.
